Professional Summary

Product designer who owns surfaces end to end, from research & flows through interaction, UI & shipped release. Led design at a B2B stablecoin banking platform, turning compliance-heavy workflows into usable interfaces for 400+ high-volume business customers across web & mobile.

Professional Experience

Endl | Dubai, United Arab Emirates **April 2025 – September 2026**
Product Designer | B2B stablecoin banking & cross-border payments

- Designed the entire web & mobile banking product, used by 400+ B2B customers to move $100M+ in transaction volume.
- Designed the pitch decks, investment memos & commercial proposals behind a $1.5M fundraise.
- Rebuilt & shipped the marketing website three times, drawing 152,683+ visitors across 162 live pages & 55 merged pull requests.

Girman Technologies | Bengaluru, India **July 2024 – March 2025**
UI/UX Designer | Consulting firm

- Designed products for the company's clients, solving real-world business problems.
- Designed the company branding, website, pitch decks & infographics, strengthening brand identity & market visibility.
- Worked alongside IIT graduates & founders with a decade in tech, building business acumen & critical thinking through their mentorship.

Raik Technologies | Mumbai, India **September 2024 – January 2025**
Design Lead | Consulting firm

- Led the design team & handled scrum management, guiding members through complex UI challenges & optimising their workflow for 60% faster design production.
- Designed AI & Web3 platforms, along with websites for the company's clients.

Mappasaurus | Dubai, United Arab Emirates **February 2024 – July 2024**
Visual & Motion Designer | AI-powered decentralised mapping platform

- Designed the core visual identity, motion design & marketing materials, achieving 3x growth in user engagement.
- Iterated a Telegram Mini App game twice in 3 months, adding multilingual support & reaching 250k+ active users & a 180k+ community. Competed at the TON Hackathon, Delhi, securing 2nd place.
